

1 Inch Nail Strip

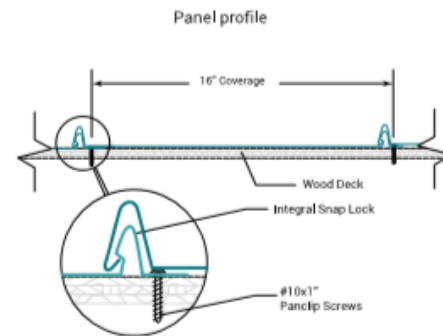

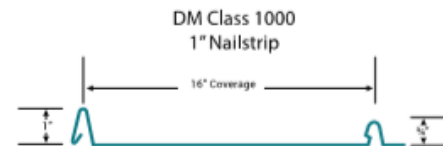

The most popular standing seam profile!

The 1" Nailstrip is considered the standard for standing seam metal roof systems.

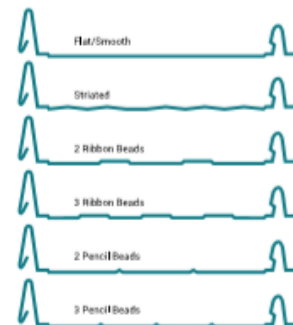

This profile allows for a uniform look as its install method allows for concealed fasteners without the use of clips.

Capable of withstanding high wind pressures and maintaining an attractive look.

The DM Class 1000 1" Nailstrip is the perfect choice for a flawless metal roof look.

Mechanical Seam

- Available in Steel, Aluminum & Copper
 - Available in 16" or 20" wide coverage
 - Over 15/32" Plywood
 - Class A Fire Approved
- High Velocity Hurricane Zone (HVHZ) Approved
 - Miami-Dade & Broward Counties Approved

Mechanical Seam

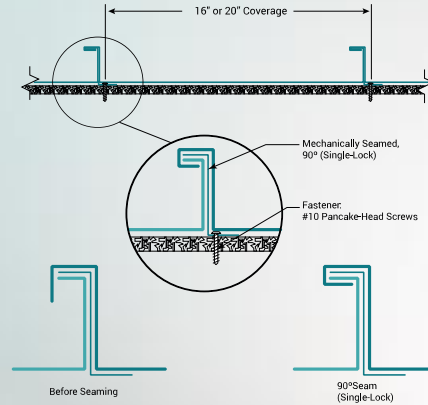

Look no further for elegance and performance. The 1½” Mechanical Seam profile allows for a simplistic installation method that does not sacrifice strength. Panels are attached with an affordable 26ga 2” clip, then the seam is mechanically closed at 90 degrees.

The design also allows for a flawless pitch break that will follow the same panel without the use of flashing metals

Advantages of Hiring a Local Roofing Company

- A Trusted Reputation
- Knowledge of Local Building Codes
- More Accessible and Responsive
- Personal Attention
- Support Local Businesses

Affordable Prices:

Without huge overhead, smaller companies or “one-man band” type operations will generally be at the lower end of the cost scale.

Flexibility:

Able to handle variations to the project themselves where larger companies have a more systematic approach which makes all jobs as close to the same as possible.
